

**Southern Spine adds new Dual Lamina configuration
to its StabiLink® “Ultimate MIS” Spinal Fixation System**

November 10, 2014

Macon, Georgia - Southern Spine, LLC, an ISO 13485:2003 certified manufacturer of implants and instruments for spinal surgery, announced today that they have added the **Dual Lamina** configuration with **Laminar-Lock™** technology to their well established and successful [StabiLink® MIS Spinal Fixation System](#). “Now that we have added the **Dual Lamina** construct to the armamentarium, our [StabiLink® System](#) offers the surgeon the broadest selection of implants to best meet the anatomical needs of their patients.” stated David C. Field, CEO of Southern Spine, “We have had hundreds of successful cases with our [StabiLink® MIS Spinal Fixation System](#) and we are excited about our continued growth in this expanding market segment.”

The new **Dual Lamina** constructs, like all the [StabiLink® System](#) implants, are designed to work with our innovative **PG™ (Precision Guided) Inserter/Compressor** that truly redefines ease-of-use. “We have found that once a surgeon uses our **PG™ Inserter/Compressor** to implant our [StabiLink® MIS implant](#), they fully appreciate how simple and complete our system is and how it can significantly reduced the “fiddle-factor” and surgery time associated with other instrumentation”, stated Mr. Field. The **PG™ Inserter/Compressor** is the first and only **All-in-One instrument** that redefines ease-of-use and allows the surgeon to quickly and accurately place the [StabiLink® Implant](#) *with or without removal of the interspinous ligaments*.

The [StabiLink® MIS Spinal Fixation System](#) is **FDA Cleared** and **CE Marked**. Based on our experience in performing hundreds of successful [StabiLink® MIS Spinal Implant](#) procedures, we are adding the new **Dual Lamina** construct with its **Laminar-Lock™** technology to our existing line of implants to provide the ultimate solutions for performing minimally invasive spinal fixation procedures.

You can get a “**Hands On**” demonstration of the innovative [StabiLink® MIS System](#) at the following conferences:

- 2014 North American Spine Society (NASS) in San Francisco, CA, November 12-14
- 2014 Medica Conference in Dusseldorf, Germany, November 12-15
